The Honorable Richard J. Riordan  
Mayor, City of Los Angeles  
Los Angeles City Hall  
200 North Main Street, Eighth Floor  
Los Angeles, California 90012

Dear Mayor Riordan:

This letter revalidates the determinations for properties and/or structures in the referenced community as described in the Letters of Map Revision (LOMRs) and Letters of Map Amendment (LOMAs) previously issued by the Federal Emergency Management Agency (FEMA) on the date(s) listed on the enclosed table. As of the effective date shown above, these LOMRs and LOMAs will revise the effective National Flood Insurance Program (NFIP) map for the referenced community, dated July 6, 1998, and will remain in effect until superseded by a revision to the NFIP map panel on which the property is shown. The FEMA case number (when available), property identifier, NFIP map panel number, and current flood insurance zone for the revalidated LOMAs and LOMRs are listed on the enclosed table.

Because these revalidated LOMRs and LOMAs will not be printed or distributed to primary map users, such as local insurance agents and mortgage lenders, your community will serve as a repository for these new data. We encourage you to disseminate the information reflected by this letter throughout your community so that interested persons, such as property owners, local insurance agents, and mortgage lenders, may benefit from the information.

For information relating to LOMRs or LOMAs that are not listed on the enclosed table, please contact the FEMA Regional Office in San Francisco, California, at (415) 923-7177.

Copies of previously issued LOMRs and LOMAs, if needed, can be obtained by contacting our Technical Evaluation Contractor, Michael Baker Jr., Inc., in Alexandria, Virginia, either by telephone at (703) 960-8800 or by facsimile at (703) 960-9125.

Sincerely,

Matthew B. Miller  
Matthew B. Miller, P.E., Chief  
Hazards Study Branch  
Mitigation Directorate

CERTIFIED MAIL
RETURN RECEIPT REQUESTED

The Honorable Richard J. Riordan
Mayor, City of Los Angeles
City Hall, Room 305
200 North Spring Street
Los Angeles, California 90012

IN REPLY REFER TO:
Case No.: 96-09-681P

Community: City of Los Angeles, California
Community No.: 060137
Panel Affected: 0072 D
Effective Date of
This Revision: MAY 15 1996
102-D

Dear Mayor Riordan:

This is in response to a letter dated April 17, 1996, from Mr. Philip L. Richardson, Division Engineer, Stormwater Management Division, Bureau of Engineering, Department of Public Works, City of Los Angeles, regarding a Letter of Map Revision (LOMR) issued to your community on March 30, 1995. Mr. Richardson requested that we revise the March 30 LOMR to remove an area west of Hauser Boulevard between Westhaven and Blackwelder Streets from the Special Flood Hazard Area, the area inundated by the flood having a 1-percent chance of being equaled or exceeded in any given year (base flood). With his letter, Mr. Richardson submitted photographs and a drainage map showing that the zone designation should be removed because the area in question is a part of the Adams Boulevard Drainage Area.

The March 30 LOMR was based on the construction of Adams Boulevard Storm Drain Units 1, 2, and 3 under Adams Boulevard from just downstream of the intersection of Blackwelder Street and La Cienega Boulevard to approximately 100 feet upstream of the intersection of Crenshaw Boulevard and Adams Boulevard, and the LOMR revised Flood Insurance Rate Map (FIRM) Panels 0072 D, 0073 D, and 0079 D.

All data required to complete our review of this request were submitted with Mr. Richardson's April 17 letter. Because this LOMR shows the effects of a publicly sponsored flood-control project that reduces flooding to existing development, fees were not assessed for the review.

We have completed our review of the submitted data and the flood data shown on the effective FIRM, and have revised the FIRM to modify the floodplain boundary delineations and zone designations of the base flood for the area west of Hauser Boulevard from approximately 100 feet south of Westhaven Street to approximately 100 feet north of Blackwelder Street.
The above-referenced area, previously designated Zone AO (Depth 1 foot), has been redesignated Zone B, an area inundated by the base flood with average depths less than 1 foot.

The modifications are shown on the enclosed annotated copy of FIRM Panel 0072 D. This LOMR hereby revises this panel of the effective FIRM dated February 4, 1987.

The revisions are effective as of the date of this letter; however, a review of the determination made by this LOMR and any requests to alter this determination should be made within 30 days. Any request to alter the determination must be based on scientific or technical data.

We are incorporating new detailed flood hazard information for the City of Los Angeles into FIRM Panel 0072 D and the Flood Insurance Study (FIS) report as a physical map revision. The preliminary copies of the FIRM and FIS report were submitted to your community on November 28, 1994. We will incorporate the modifications described in this LOMR into the FIRM before the FIRM becomes effective.

The basis of this LOMR is, in whole or in part, a storm drain project. The National Flood Insurance Program (NFIP) regulations, as cited in Paragraph 60.3(b)(7), require that communities assure that the flood-carrying capacity within the altered or relocated portion of any watercourse is maintained. This provision is incorporated into your community's existing floodplain management regulations. Consequently, the ultimate responsibility for maintenance of the channel modification rests with your community.

Because this LOMR will not be printed and distributed to primary users, such as local insurance agents and mortgage lenders, your community will serve as a repository for these new data. We encourage you to disseminate the information reflected by this LOMR throughout the community, so that interested persons, such as property owners, local insurance agents, and mortgage lenders, may benefit from the information. We also encourage you to prepare an article for publication in your community's local newspaper. This article should describe the changes that have been made and the assistance that officials of your community will give to interested persons by providing these data and interpreting the NFIP maps.

The map panel as listed above and as revised by this letter will be used for all flood insurance policies and renewals issued for your community.

This determination has been made pursuant to Section 206 of the Flood Disaster Protection Act of 1973 (Public Law 93-234) and is in accordance with the National Flood Insurance Act of 1968, as amended (Title XIII of the Housing and Urban Development Act of 1968, Public Law 90-448), 42 U.S.C. 4001-4128, and 44 CFR Part 65. Pursuant to Section 1361 of the National Flood Insurance Act of 1968, as amended, communities participating in the NFIP are required to adopt and enforce floodplain management regulations that meet or exceed NFIP criteria. These criteria are the minimum requirements and do not supersede any State or local requirements of a more stringent nature. This includes adoption of the effective FIRM to which the regulations apply and the modifications described in this LOMR.
If you have any questions regarding floodplain management regulations for your community or the NFIP in general, please contact the Consultation Coordination Officer (CCO) for your community. Information on the CCO for your community may be obtained by contacting the Director, Mitigation Division of FEMA in San Francisco, California at (415) 923-7177. If you have any technical questions regarding this LOMR, please contact Mr. John Magnotti of our staff in Washington, DC, either by telephone at (202) 646-3932 or by facsimile at (202) 646-4596.

Sincerely,

[Signature]

Michael K. Buckley, P.E., Chief
