agenda

1. Schedule Update
2. Community Workshop #2 – Preliminary Questionnaire Results
3. Concept Design Update
4. Review of Vision, Goals & Objectives
5. Open Discussion
6. Next Steps
master plan process
our plan

5 stakeholder working group meetings
6 large community workshops
2 pop-up events / 3 online surveys
Date: SATURDAY, November 2\textsuperscript{nd}
1:00pm or 1:30pm?

- Location Options:
  - Marshall High School
  - Elysian Masonic Lodge

- Outreach
  - Invitations (October 10\textsuperscript{th})
  - Increase participate diversity
  - Other neighborhood opportunities

- King Middle School Participation?
COMMUNITY WORKSHOP #2 RECAP
community workshop #2

Date: August 22; 8-11am (On Site)

Attendance: 514 people signed in, estimate over 600 people attended
community workshop #2

RECEIVED OVER 1,450 QUESTIONNAIRE RESPONSES

ADDITIONAL QUESTIONS
Please answer the following:
02: What is your favorite park in Los Angeles? Or anywhere? And why?

03: What one word best describes what the Silver Lake Reservoir Complex (SLRC) should be or feel like?

04: How often do you visit the SLRC?
- Once a day
- Once a week
- More than once a week
- Once a month
- Once a year
- Other:

05: How do you typically get to the SLRC?
- Personal vehicle
- Walk
- Public Transit
- Bike
- Skateboard
- Other:

06: How would you like to get to SLRC in the future?

07: Who do you bring with you to the SLRC?
- Children
- Parents
- Friends
- Other:

Zip-code where you live:

Your age (choose one): [ ] Under 18 [ ] 19-25 [ ] 26-35 [ ] 36-45 [ ] 46-55 [ ] 56-65 [ ] 66+

What We Heard

Q. What one word best describes what the Silver Lake Reservoir Complex should feel like?
4 REVIEW VISION, GOALS & OBJECTIVES
vision, goals & objectives

VISION

Repurpose the reservoir complex and surrounding site into a neighborhood park that blends urban wilderness with community gathering and contemplative spaces while protecting its unique character.

GOALS

WILDLIFE

To provide a biodiverse ecology with adequate food and shelter to support a year-round, vibrant local community as well as seasonal migratory species.

PEOPLE

To provide a diverse range of opportunities and activities that encourages community gathering and fosters stewardship.

HABITAT

WATER

QUALITY

aquatic life
human contact

QUANTITY

TOP 20 QUESTIONNAIRE RESULTS

FOR STAKEHOLDER WORKING GROUP PURPOSES ONLY
NEXT STEPS

• HAR / CS to send CW#3 invitation by Oct 10th

• Community Workshop #3 – Nov 2nd

• Next Stakeholder Working Group Meeting: Dec 5th

• Community Workshop #4 – Jan 23 (Preferred Master Plan Design)

Other:
• Constructing in Water Fact Sheet
• Physical Model
WILL THE IMPLEMENTATION OF THE PROJECT REQUIRE DRAINING THE RESERVOIRS FULLY?

There are a variety of construction methods that would not require draining of the reservoirs in order to construct elements along the water's edge or to modify the embankment. Temporary diversion barrier controls (e.g. cofferdams) allow for "working in the dry" when construction projects are within surface waters. They prevent water from entering work zones such as where excavation, concrete pouring, drilling, or other tasks are being conducted. They function by holding back water and creating a relatively dry area for construction activities.

WHAT TYPE BARRIER MIGHT NEED TO BE USED IN THE RESERVOIRS?

There are a variety of temporary barrier types, or cofferdams, available depending on the type of construction which will need to be undertaken to install park design elements. If large areas of water need to be diverted, cofferdams are typically made of steel. If small areas need to be diverted, they are often made of rubber. Any cofferdam used to construct the new park, will be engineered to ensure safety of workers and allow the realization of the design vision.

DOES THE MASTER PLAN DESIGN AFFECT THE USE OF DIVERSION BARRIERS?

Depending on the final design developed with the community, the selective use of cofferdams within the reservoir might be appropriate. For example, floating walkways can be installed in a variety of water depths with little impact to the reservoir bottom and edges. Terraces and overlooks may require the use of cofferdams. The design team will be working with the community to understand potential construction impacts of various design elements in order to achieve our shared vision while minimizing construction impacts.

HAS THE DESIGN TEAM EVER USED DIVERSION BARRIERS IN PREVIOUS PROJECTS?

The Design Team and the City of Los Angeles has extensive experience with constructed projects in rivers, lakes, and along coasts which cannot be drained.
