

**2021 SOLAR PHOTOVOLTAIC AND ENERGY STORAGE PRE-  
QUALIFIED CONTRACTORS LIST (PQCL) FOR MUNICIPAL  
FACILITIES AND RELATED PROJECTS**

This prequalified list was established by the Board of Public Works to provide services that could include design, design/build, construction, and potentially financing of new solar photovoltaic (PV) systems, solar PV with energy storage systems, or just energy storage systems at municipal facilities. Solar PV and energy storage systems may be interconnected as a Net Energy Metering (NEM), Feed-in-Tariff (FiT), or other utility configurations that will be established on a project-by-project basis. The PQCL will be available for all City Departments, including proprietary and semi-proprietary departments, and the Housing Authority of the City of Los Angeles (HACLA). A construction contract will be executed on a project-by-project basis, and approved by the appropriate City contracting authority, which could be the Board of Public Works, City Council, or other City Boards or agencies with contracting authority.

List of Design-Build Contractors  
(In alphabetical order)  
**(In effect until December 17, 2026)**

- Baker Electric, Inc.
- Black & Veatch Corporation
